***Urgent appeal** to deny permits for roads across the 440 servitude.*

Construction of new roads across the 440 servitude would permit more than 6,000 houses to be built in an area rich in indigenous flora and fauna, bringing 16,000 new residents with their vehicles to our already congested streets.

Your denial of the necessary permits will help prevent destruction of the Rivière-à-l'Orme Ecoforest Corridor, an eco-territory identified for protection in Montreal's new *Politique de protection et de mise en valeur des milieux naturels.*

Specifically, the undersigned request that you deny the permits for the extension of Antoine-Faucon and Pierrefonds Boulevards and roads across the 440 servitude that would provide access to the first such proposed housing development. Taking into account the widespread opposition in this matter, we also request that you facilitate true public consultations on this issue.
